The next 4 weeks: your plan 52

Closing 53

BEFORE YOU START

How to use this guide

1. **Open the day's page every morning.**
   Each day is a single page you can read in a few minutes.
2. **Look at the focus of the day first.**
   Every day you focus on one thing. The rest will soon feel familiar.
3. **Follow the nutrition tips.**
   The meals are examples. Swap them for something similar whenever you like.
4. **Hit your movement goal.**
   On training days, do the workout too. The exercises are explained on p. 10.
5. **Do the task of the day.**
   One small step that belongs to that day.
6. **Tick the boxes in the evening.**
   Every box you tick makes your progress visible.

If you miss a day, don't start over. Just pick up where you left off. 30 days doesn't mean 30 perfect days in a row.

On every daily page

TODAY'S FOCUS
The one topic of the day

Strength or recovery

TIP OF THE DAY
A practical tip

TASK OF THE DAY
The small step you take today

IMPORTANT

This guide is for general information only and does not replace medical advice, diagnosis or treatment. If you have a chronic condition, take medication regularly, are pregnant or breastfeeding, or have a history of eating disorders, talk to your doctor or a registered dietitian before changing how you eat or exercise. Stop right away if you feel pain, dizziness, chest pain or shortness of breath during exercise. Results vary from person to person.

INTRODUCTION

Why a 30-day plan?

There is so much information about losing weight that a lack of knowledge is rarely the problem. The hard part is knowing where to start and what to do today. A new diet one day, another rule the next... After a while it's easy to get tired and give up.

This plan takes a different approach:

- ✓ **No new diet every day.** Just familiar foods you can easily find at the grocery store.
- ✓ **You don't change everything at once.** You add one small step each day.
- ✓ **You don't have to be perfect.** Following most of the plan is enough.

At the end of the 30 days, the goal isn't to finish a temporary diet. It's to have built a routine for eating, moving and training that works for you.

30 days, 4 phases

PHASE 1
BUILD THE FOUNDATION
Days 1–7

PHASE 2
STRENGTHEN THE ROUTINE
Days 8–14

PHASE 3
STAY CONSISTENT
Days 15–21

PHASE 4
MAKE IT YOUR SYSTEM
Days 22–30

Each phase builds on the one before. New habits are added one at a time.

REALISTIC EXPECTATIONS

Everyone starts from a different place, with a different body and a different daily life, so results vary too. Your weight can fluctuate, especially in the first days, because of water and digestion. This plan isn't about a quick change. It's about a start you can keep up.

BEFORE DAY 1

7 basics you should know

Short and simple: the reasoning behind everything you'll do in this plan.

Calorie deficit

Your body uses energy all day long. Losing weight comes down to taking in a little less energy than you use, over a period of time. This is called a calorie deficit. The key word is “little”: eating too little brings tiredness, strong hunger and the urge to quit. You don't have to count calories in this plan. We aim for a moderate deficit with the plate method, hand portions and more movement.

In the plan: The plate method, hand portions and a bit more movement every day.

Protein

Eggs, yogurt, cheese, chicken, fish, meat and legumes are sources of protein. Protein can help you stay full for longer and helps protect your muscles while you lose weight. Throughout the plan, every main meal will include a source of protein.

In the plan: From day 3: one palm of protein with every main meal.

Fiber

Vegetables, fruit, legumes and whole grains contain fiber. High-fiber foods are filling, support digestion and help you feel satisfied. A simple goal: half your plate vegetables.

In the plan: From day 5: half your plate vegetables at lunch and dinner.

Water

Drinking enough matters for your energy and your overall health, and thirst is sometimes mistaken for hunger. For most adults, about 8–10 glasses a day (2–2.5 liters, about 70–85 fl oz) is a good start. You need more in hot weather and when you exercise. If you have to limit fluids for health reasons, follow your doctor's advice.

In the plan: From day 2: 8–10 glasses of water a day.

BEFORE DAY 1

Daily movement

The steps you take during the day matter as much as your workouts. Walking, taking the stairs, standing during phone calls... Daily movement increases the energy you use, and for most people it's the easiest way to start.

In the plan: A walk every day; the step goal grows step by step.

Strength training

When you lose weight, you can lose muscle as well as fat. Regular strength training can help you keep your muscles and get stronger. This plan includes short full-body workouts three times a week that you can do at home.

In the plan: 3 short workouts a week, 13 workouts in 30 days.

Sleep and recovery

Too little sleep can affect your appetite, your energy and your motivation. Most adults are advised to get 7–9 hours of sleep. Rest days are part of the plan too: your muscles recover between workouts.

In the plan: At least 1 rest day a week and a sleep routine from day 16.

WHAT THIS PLAN DOESN'T HAVE

— No starving.

— No list of forbidden foods.

— No eating the same thing for days.

— No detoxes, “miracle” teas or “fat-burning” products.

Habits are added one at a time

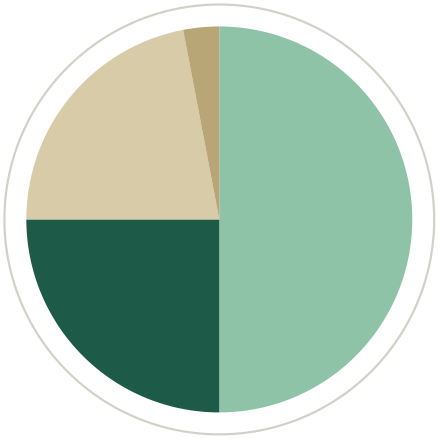

You don't change everything at once. Each new habit builds on the one before.

Day 1	Daily movement	**Day 10**	Eat slowly
Day 2	Water and first workout	**Day 11**	Shopping list
Day 3	Protein with every main meal	**Day 12**	Prepare ahead
Day 5	Half your plate vegetables	**Day 15**	The 10-minute rule
Day 6	The plate method	**Day 16**	Sleep routine
Day 8	Hand portions	**Day 22**	Habit stacking
Day 9	Watch liquid calories	**Day 24**	The hunger scale

NUTRITION

How to build your plate

The easiest way to balance your portions without counting calories: the plate method and hand portions. Your hand is always with you, and it's in proportion to your body.

- **Vegetables** — half your plate
- **Protein** — a quarter of your plate
- **Carbs** — a quarter of your plate
- **Fat** — a small amount

Hand portions (per main meal)

GROUP	PORTION	ABOUT THE SAME AS
Protein	**1 palm**	100–150 g (3.5–5 oz) cooked chicken, meat or fish · 2–3 eggs · 1 bowl (200 g, about 3/4 cup) yogurt
Carbs	**1 fist**	3/4 cup cooked rice, quinoa or pasta · 1 medium potato · 1–2 thin slices of whole-grain bread
Vegetables	**2 handfuls**	Salad, steamed or roasted vegetables, a vegetable stew
Fat	**1 thumb**	1 tablespoon olive oil · 10–12 almonds · 5–6 olives

These portions are a starting point. If you're larger, very physically active, or get very hungry again soon after a meal, increase your protein and carb portions a little. Men and very active people can often go up to about 1.5–2 times the protein and carb portions.

Daily rhythm: 3 main meals and 1 snack when you're really hungry. The snack is optional.

Measures used in this plan: 1 bowl of yogurt: about 200 g (3/4 cup) · 1 glass: about 200 ml (7 fl oz) · 1 matchbox-sized piece of cheese: about 30 g (1 oz)

PREPARATION

Basic shopping list

Almost every meal in the plan is made with foods from this list. You don't need to buy everything at once.

PROTEIN

- [ ] Eggs
- [ ] Chicken breast / thighs
- [ ] Turkey
- [ ] Lean ground beef
- [ ] Fish (salmon, cod, sardines)
- [ ] Canned tuna
- [ ] Yogurt, kefir
- [ ] Greek yogurt or skyr
- [ ] Cottage cheese, feta

CARBS

- [ ] Oats
- [ ] Rice
- [ ] Quinoa or bulgur
- [ ] Whole-grain bread / wraps
- [ ] Whole-wheat pasta
- [ ] Potatoes

LEGUMES

- [ ] Red lentils
- [ ] Green lentils
- [ ] Chickpeas
- [ ] Beans (canned is fine)
- [ ] Roasted chickpeas

VEGETABLES

- [ ] Tomatoes, cucumbers, peppers
- [ ] Spinach, lettuce, arugula
- [ ] Broccoli, zucchini, carrots
- [ ] Onions, garlic
- [ ] Frozen mixed vegetables

FRUIT

- [ ] Apples, pears
- [ ] Bananas
- [ ] Oranges / clementines
- [ ] Strawberries or blueberries (frozen is fine)

HEALTHY FATS

- [ ] Olive oil
- [ ] Olives
- [ ] Walnuts, almonds, hazelnuts

OTHER

- [ ] Hummus
- [ ] Lemons
- [ ] Spices (chili flakes, cumin, oregano, cinnamon)
- [ ] Sparkling water

Frozen vegetables and fruit are just as useful as fresh: practical, long-lasting and easy to prepare.

MOVEMENT

Warm-up, mobility and brisk walking

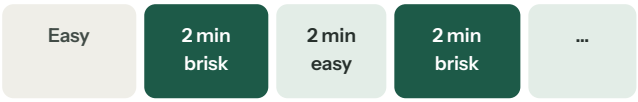

Warm-up · 5 minutes

Before every workout.

Marching in place	**1 minute**
Arm circles (forward and back)	**10 + 10**
Hip circles	**10 reps**
Slow half squats	**10 reps**
Cat-cow (on all fours)	**8 reps**

Brisk walk

Brisk walk: Start at a comfortable pace, then alternate 2 minutes brisk and 2 minutes easy. On the brisk part you can still talk, but you couldn't sing.

Mobility routine · 10 minutes

On active recovery days and any evening you like.

Cat-cow — **8 reps**
On all fours, slowly round and then arch your back.

Hip flexor stretch — **30 sec each side**
One knee on the floor, lean gently forward without arching your lower back.

Chest opener — **8 reps each side**
Lying on your side, sweep your top arm back in an arc.

Hamstring stretch — **30 sec each side**
One heel forward, knees slightly bent; hinge forward from the hips.

Child's pose — **45 sec**
Knees on the floor, sit your hips back toward your heels, arms stretched forward.

Deep breathing — **1 minute**
Breathe in through your nose for 4 seconds, out through your mouth for 6.

Exercise guide

Every workout in the plan is made up of these 8 exercises. No equipment needed; for rows, a resistance band or a backpack is enough.

Squat

1. Feet shoulder-width apart, toes turned slightly out.
2. Push your hips back and down as if sitting on a chair; chest up, knees in line with your toes.
3. Push through your heels to stand up.

Easier: Sit down on a chair behind you and stand back up.

Harder: Take 3 seconds to lower or wear a backpack.

Reverse lunge

1. Stand tall and take a big step back with one foot.
2. Bend both knees and lower down; your back knee comes close to the floor.
3. Push through your front heel to return. Reps are per leg.

Easier: Hold on to a wall or chair and go down less.

Harder: Hold a water bottle in each hand.

Push-up

1. Hands under your shoulders; a straight line from head to heels.
2. Lower your chest under control; elbows at about 45 degrees to your body.
3. Push through your palms to come back up.

Easier: From easy to hard: wall push-up, incline push-up on a table or counter, knee push-up.

Harder: Classic push-up, 3 seconds down.

Row

1. Anchor a resistance band securely, or use a backpack with books inside.
2. With the backpack: knees slightly bent, back flat, lean forward; pull the bag toward your belly.
3. Squeeze your shoulder blades together, then lower under control.

Easier: Lighter backpack or looser band.

Harder: Heavier backpack; hold for 2 seconds at the top.

Glute bridge

1. Lie on your back; knees bent, feet flat on the floor, hip-width apart.
2. Push through your heels to lift your hips; shoulders to knees in a straight line.
3. Squeeze your glutes for 1 second at the top, lower slowly.

Easier: Lift your hips less.

Harder: Do it on one leg or hold for 3 seconds at the top.

Plank

1. Elbows under your shoulders, forearms on the floor.
2. Your body is straight from head to heels; hips neither up nor down.
3. Brace your stomach lightly and keep breathing.

Easier: Knees on the floor or hands on a table.

Harder: Add 10 seconds.

Dead bug

1. Lie on your back; arms toward the ceiling, knees bent at 90 degrees in the air.
2. Keep your lower back close to the floor; slowly extend your right arm and left leg, then return.
3. Continue with the other side. Reps are per side.

Easier: Move only your legs and tap your heel on the floor.

Harder: Go slower and pause for 2 seconds when extended.

Wall sit

1. Lean your back against a wall, feet about one step away from it.
2. Slide down until your knees are bent to about 90 degrees.
3. Weight in your heels; hold for the time given.

Easier: Bend your knees less and stay higher.

Harder: Add 10–15 seconds.

TRAINING RULES

- ✓ Warm up for 5 minutes before every workout.
- ✓ Finish every set with 2–3 reps left in the tank.
- ✓ Good form matters more than the number of reps.
- ✓ Stop if you feel sharp or increasing pain.
- ✓ If an exercise feels too hard, choose the easier version. That's not a step back, it's the right start.

PROGRESS

Progress tracker

Scale: In the morning, after using the bathroom and before breakfast; always on the same scale.

Waist: At belly-button height, without pulling your stomach in or holding your breath.

Photo (optional): Same light, same clothes; from the front and the side.

	DAY 1	DAY 7	DAY 14	DAY 21	DAY 30
Weight (kg / lb)					
Waist (cm / in)					
Hips (cm / in)					
Average daily steps					
Workouts this week (number)					
Energy (1–5)					
Sleep (average hours)					
How do my clothes fit?					

NOTES AND POSITIVE CHANGES

WHY DOES WEIGHT FLUCTUATE?

A salty dinner, how much you drank, digestion, your hormonal cycle and a hard workout can change the number on the scale by 1–2 kg (2–4 lb) from one day to the next. That doesn't mean you lost or gained fat. Look at the trend over the weeks, not at a single weigh-in. Your energy, sleep, strength and how your clothes fit are part of your progress too.

HABITS

30-day habit tracker

Habits are added one at a time throughout the plan. Every evening, tick the ones you completed; gray boxes are habits that haven't started yet.

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30
Movement goal From day 1																														
Water (8–10 glasses) From day 2																														
Workout (on planned days) From day 2																														
Protein with every main meal From day 3																														
Half your plate vegetables From day 5																														
Meal plan / prep From day 11																														
Sleep routine From day 16																														

You don't have to complete all of them every day. The goal is to see the rows fill up over time. An empty box doesn't stop you from ticking the next day's box.

PHASE 1 · DAYS 1–7

BUILD THE FOUNDATION

The first week isn't about changing everything. You're laying the foundation: regular meals, water, more movement and your first workouts.

IN THIS PHASE

- ✓ Understand your starting point
- ✓ Bring structure to your meals
- ✓ Build a water routine
- ✓ Move more every day
- ✓ Start your first simple habits
- ✓ Do your first workouts

NEW HABITS

Movement goal · Water · Protein · Vegetables · Plate method

You may feel slightly sore in the first few days. That's normal and usually fades within a few days.

THIS PHASE AT A GLANCE

Day 1	Find your starting point	No workout
Day 2	Build your water routine	**Workout A**
Day 3	Protein with every main meal	Active recovery
Day 4	Move more every day	**Workout B**
Day 5	Add more vegetables	Active recovery
Day 6	Build your plate	**Workout A**
Day 7	Review your first week	Rest day

TODAY'S FOCUS

Find your starting point

Today you're not trying to do anything perfectly. You're just seeing where you are: taking your measurements and observing a normal day.

NUTRITION

Set up a rhythm of 3 main meals and write down or photograph what you eat. No judging, just observing.

Breakfast	2 boiled eggs, 1 slice whole-grain bread, tomato, cucumber, 5 olives
Lunch	1 bowl lentil soup, 1 palm grilled chicken, a big green salad
Snack	1 apple and 10 raw almonds (if you're hungry)
Dinner	Chicken stir-fry (1 palm chicken, peppers, tomato, onion), 1 fist rice or bulgur, 1 bowl yogurt

MOVEMENT

20-minute walk

If your phone or watch counts steps, write down today's step count. That's your starting value.

WORKOUT

No workout

If you like, try the warm-up on p. 9 once to get to know the exercises.

TIP OF THE DAY

Don't try to change everything on day one. Big starts usually end quickly; small starts keep going.

TASK OF THE DAY

Fill in the Day 1 column of the Progress Tracker (p. 12): weight, waist and today's steps.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Followed the nutrition plan
- [ ] Movement goal done
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Build your water routine

Today's focus is water. Drinking regularly throughout the day is one of the simplest habits, and one of the most often forgotten.

NUTRITION

Drink 1 glass of water with every meal. Try swapping sugary drinks for water today.

Breakfast	Oat bowl: 4 tablespoons oats (40 g, about 1/2 cup), 1 bowl yogurt, half a banana, cinnamon
Lunch	Tuna salad: 1 can drained tuna, 1/2 cup cooked chickpeas, lettuce, tomato, cucumber, lemon, 1 teaspoon olive oil
Snack	1 glass of kefir or milk and 1 clementine
Dinner	Baked skinless chicken thigh (1 palm), roasted vegetables (zucchini, peppers, carrots), 1 medium boiled potato

MOVEMENT

20-minute walk

At a different time from your workout, for example at lunchtime.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60–90 sec between sets

Squat	**2 × 10**
Push-up (easier version)	**2 × 8**
Row	**2 × 10**
Glute bridge	**2 × 12**
Plank	**2 × 20 sec**

First workout: focus on learning the technique. Check the exercises on p. 10.

TIP OF THE DAY

Keep water where you can see it. A bottle on your desk is often the best reminder.

TASK OF THE DAY

Get a water bottle ready and aim for about 8 glasses of water over the day.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Protein with every main meal

Protein can help you stay full for longer and helps protect your muscles. Today you add a protein source to every main meal.

NUTRITION

Breakfast, lunch and dinner: every plate includes eggs, yogurt, cheese, chicken, fish, meat or legumes.

Breakfast	Feta omelet: 2 eggs, 1 matchbox-sized piece of feta, 1 handful spinach; 1 slice whole-grain bread
Lunch	1 bowl white bean stew, 1/2 fist rice or 1 slice bread, tzatziki
Snack	1 bowl Greek yogurt or skyr, a few strawberries
Dinner	Grilled meatballs (1 palm, 4–5 pieces), white bean salad or a chopped tomato-cucumber salad

MOVEMENT

25-minute walk

Followed by 10 minutes of mobility.

WORKOUT

Active recovery

10-minute mobility routine (p. 9).

TIP OF THE DAY

Protein sources: eggs, yogurt, kefir, feta, cottage cheese, chicken, turkey, fish, tuna, red meat, lentils, chickpeas, beans. Pick at least one from this list for every main meal.

TASK OF THE DAY

Choose and write down the protein sources for tomorrow's three main meals now.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Move more every day

Movement outside your workouts matters too. Today you add small movement breaks to your day.

NUTRITION

Protein with every main meal continues. When you crave something sweet, try a piece of fruit first.

Breakfast	Breakfast plate: 2 eggs, 1 matchbox-sized piece of feta, tomato, cucumber, greens, 1 slice whole-grain bread
Lunch	Chicken wrap: 1 whole-wheat wrap, 1 palm chicken, lettuce, tomato, yogurt sauce
Snack	Carrot and cucumber sticks, 2 tablespoons hummus
Dinner	Baked salmon or white fish (1 palm), steamed broccoli, 1 fist rice or bulgur

MOVEMENT

25-minute walk + 3 movement breaks

Every 1–2 hours, get up for 3–5 minutes: take the stairs, stand during a phone call, walk a short loop.

WORKOUT

Workout B · Full-body strength

5-min warm-up first · Rest 60–90 sec between sets

Reverse lunge	**2 × 8 per leg**
Row	**2 × 10**
Push-up (easier version)	**2 × 8**
Dead bug	**2 × 6 per side**
Wall sit	**2 × 20 sec**

TIP OF THE DAY

Stairs instead of the elevator, walking instead of driving short distances. Small choices add up by the end of the day.

TASK OF THE DAY

Set 3 reminders on your phone: a short movement break at 11 a.m., 3 p.m. and 6 p.m.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Add more vegetables

Vegetables are filling, contain fiber and make your plate satisfying. Today there are vegetables in at least two meals.

NUTRITION

At lunch and dinner, fill about half your plate with vegetables.

Breakfast	Scrambled eggs with tomatoes and peppers (2 eggs), 1 slice whole-grain bread, cucumber
Lunch	A big portion of green beans cooked in olive oil, 1 bowl yogurt, 1 slice whole-grain bread
Snack	1 pear and 1 matchbox-sized piece of feta
Dinner	Spinach with lean ground meat, 1 bowl yogurt, 1/2 fist rice or 1 slice bread

MOVEMENT

30-minute walk

Followed by 10 minutes of mobility.

WORKOUT

Active recovery

Your muscles may feel a little sore after yesterday's workout. 10-minute mobility routine (p. 9).

TIP OF THE DAY

Ready-to-eat vegetables beat good intentions. Keep chopped carrots, cucumber and tomatoes on the front shelf of your fridge.

TASK OF THE DAY

Prep vegetables for 2–3 days: wash, chop and store them in a container in the fridge.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Followed the nutrition plan
- [ ] Movement goal done
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Build your plate

The plate method is the easiest way to balance your portions without counting calories: half vegetables, a quarter protein, a quarter carbs.

NUTRITION

Today, build your lunch and dinner using the plate method (p. 7).

Breakfast	Greek yogurt bowl: 1 bowl Greek yogurt or skyr, 1 handful fruit, 1 tablespoon oats, 2 walnut halves
Lunch	1 palm grilled chicken, 1 fist rice or bulgur, half the plate chopped salad
Snack	1 boiled egg and 1 piece of fruit
Dinner	1 bowl chickpea stew with meat, half the plate seasonal salad, 1 bowl tzatziki

MOVEMENT

25-minute walk

At an easy pace; you should be able to chat.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60–90 sec between sets

Squat	**2 × 10**
Push-up (easier version)	**2 × 8**
Row	**2 × 10**
Glute bridge	**2 × 12**
Plank	**2 × 20 sec**

The exercises feel more familiar now. Same sets and reps, better technique.

TIP OF THE DAY

Use a smaller plate. The plate looks full while the portion stays reasonable.

TASK OF THE DAY

Take a photo of a meal you built with the plate method. Use it as an example in the days ahead.

MY NOTES

END-OF-DAY CHECK-IN

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Review your first week

One week done. Today you're not grading yourself; you're just looking at what worked.

NUTRITION

Keep your meal rhythm, even on the weekend. If you eat out, choose one protein and one vegetable.

Breakfast	2 eggs (boiled or scrambled with vegetables), 1 matchbox-sized piece of feta, 5 olives, lots of greens, 1–2 slices whole-grain bread
Lunch	1 bowl lentil soup, 1 bowl yogurt, seasonal salad, 1 slice bread
Snack	1 glass of kefir and a few slices of fruit
Dinner	Baked meatballs (1 palm) with vegetables (zucchini, peppers, tomatoes), 1 medium potato

MOVEMENT

40-minute long walk

In a park, by the water or in nature; at a pace where you can talk.

WORKOUT

Rest day

Your muscles get stronger as they recover between workouts.

TIP OF THE DAY

Progress isn't just the number on the scale. Your energy, your sleep, your breath on the stairs and how your clothes fit are part of it too.

TASK OF THE DAY

Fill in the Week 1 Review (p. 22) and write your Day 7 values in the Progress Tracker.

MY NOTES

END-OF-DAY CHECK-IN

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

DAYS 1–7

Week 1 review

The first week is usually the hardest, because everything is new. Every day you complete is a step.

HOW MANY DAYS THIS WEEK?

Water (8–10 glasses)	☐ ☐ ☐ ☐ ☐ ☐ ☐
Protein with every main meal	☐ ☐ ☐ ☐ ☐ ☐ ☐
Half your plate vegetables	☐ ☐ ☐ ☐ ☐ ☐ ☐
Movement goal	☐ ☐ ☐ ☐ ☐ ☐ ☐
Workout (on planned days)	☐ ☐ ☐

MEASUREMENTS

Weight	Waist	Energy (1–5)	Average sleep

Also write the values in the Progress Tracker (p. 12).

What went best this week?

Where did I struggle most?

My one focus for next week:

PHASE 2 · DAYS 8–14

STRENGTHEN THE ROUTINE

The foundation is in place. Now you're making the structure stronger: portions, planning and regular workouts.

IN THIS PHASE

- ✓ Structure your meals better
- ✓ Keep your portions in check
- ✓ Fit protein and vegetables into every meal
- ✓ Move more
- ✓ Train regularly
- ✓ Notice your first progress

NEW HABITS

Hand portions · Liquid calories · Eating slowly · Shopping list · Meal prep

The workouts go up to 3 sets. If that feels too hard, stay at 2 sets; doing it regularly matters more than doing more.

THIS PHASE AT A GLANCE

Day 8	Measure portions with your hand	**Workout A**
Day 9	Watch what you drink	Cardio day
Day 10	Eat slowly	**Workout B**
Day 11	Plan your shopping	Active recovery
Day 12	Prepare ahead	**Workout A**
Day 13	Choose snacks on purpose	Rest day
Day 14	See your first progress	Rest day

TODAY'S FOCUS

Measure portions with your hand

No scale or app needed: your palm, fist and thumb are always with you. Today you measure your portions with your hand.

NUTRITION

Every main meal: 1 palm protein, 1 fist carbs, 2 handfuls vegetables, 1 thumb fat (p. 7).

Breakfast	Oat bowl: 40 g (1/2 cup) oats, 1 bowl yogurt, 1 handful strawberries or blueberries, 1 thumb-sized portion of walnuts
Lunch	Chicken stir-fry (1 palm), 1 fist rice or bulgur, 2 handfuls salad
Snack	1 glass of kefir and 1 apple
Dinner	Grilled turkey or chicken breast (1 palm), 1 fist roasted potatoes, 2 handfuls steamed vegetables, 1 teaspoon olive oil

MOVEMENT

7,000 steps or a 35-minute walk

If your starting average is very low, add about 1,000 steps to it instead.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60–75 sec between sets

Squat	**3 × 12**
Push-up	**3 × 8–10**
Row	**3 × 12**
Glute bridge	**3 × 15**
Plank	**3 × 25 sec**

New phase: the workouts go up to 3 sets.

TIP OF THE DAY

Serve your portion onto your plate before you start eating. Don't keep the pot or serving dish on the table.

TASK OF THE DAY

Make all three main meals with hand portions today. Note which portion is different from what you're used to.

MY NOTES

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Watch what you drink

Sugary drinks, fruit juice and sweetened coffee can add a lot of energy without you noticing. Today you look at what you drink.

NUTRITION

Today's drinks: water, sparkling water, plain tea, black coffee and unsweetened kefir. If you add sugar to your tea, cut it in half.

Breakfast	Scrambled eggs with vegetables (2 eggs), 1 matchbox-sized piece of feta, 1 slice whole-grain bread, cucumber
Lunch	6 lentil patties, lots of greens and lemon, 1 bowl yogurt
Snack	1 handful roasted chickpeas and 1 glass of kefir
Dinner	Baked salmon (1 palm), 1 fist rice or bulgur, arugula salad

MOVEMENT

35-minute brisk walk

10 min easy + 5 × (2 min brisk, 2 min easy) + 5 min easy. On the brisk part you can still talk, but you couldn't sing.

WORKOUT

Cardio day

No strength workout today; the brisk walk is your cardio session.

TIP OF THE DAY

Eat the fruit instead of drinking the juice. The fiber keeps you fuller.

TASK OF THE DAY

Write down everything you drink today. In the evening, mark the sugary ones and swap one of them tomorrow.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Eat slowly

It takes a while for the feeling of fullness to reach your brain. Today you stretch at least one meal over 20 minutes.

NUTRITION

Put your fork down between bites. No phone or screens while you eat.

Breakfast	2 boiled eggs, 2 tablespoons cottage cheese, tomato, cucumber, greens, 1 slice whole-grain bread
Lunch	Chicken bulgur salad: 1 palm chicken, 1 fist bulgur or quinoa, tomato, cucumber, parsley, lemon
Snack	1 bowl Greek yogurt, cinnamon
Dinner	Zucchini or okra stewed with meat (1 palm meat), 1 bowl yogurt, 1 slice bread

MOVEMENT

7,000 steps or a 35-minute walk

A short 10-minute walk after a meal counts too.

WORKOUT

Workout B · Full-body strength

5-min warm-up first · Rest 60–75 sec between sets

Reverse lunge	**3 × 10 per leg**
Row	**3 × 12**
Push-up	**3 × 8–10**
Dead bug	**3 × 8 per side**
Wall sit	**3 × 30 sec**

TIP OF THE DAY

Start your meal with a salad or soup. That way you eat the main dish more calmly.

TASK OF THE DAY

Set a timer at dinner and stretch the meal over at least 20 minutes.

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Plan your shopping

You eat what's in the house. Today you write a shopping list that fits the plan.

NUTRITION

Shop on a full stomach and stick to the list. The basic list is on p. 8.

Breakfast	Oatmeal: cook 40 g (1/2 cup) oats in 1 cup of milk, add half a banana and cinnamon; 1 boiled egg on the side
Lunch	Leftovers from last night's dinner or a tuna salad with lots of greens
Snack	Carrot sticks and 2 tablespoons hummus
Dinner	1 bowl red lentil stew, 1 fist rice or bulgur, 1 bowl yogurt, salad

MOVEMENT

7,000 steps

Followed by 10 minutes of mobility.

WORKOUT

Active recovery

10-minute mobility routine (p. 9).

TIP OF THE DAY

At the store, start with produce, meat and dairy. If packaged snacks aren't on your list, they don't go in your cart.

TASK OF THE DAY

Write a shopping list for the next 3–4 days and go shopping.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Followed the nutrition plan
- [ ] Movement goal done
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Prepare ahead

Tired evenings are the hardest moments. Today you prepare food for 2–3 meals in advance.

NUTRITION

One pot of protein, one pot of grains and one tray of roasted vegetables: the base for a few days is ready.

Breakfast	Cheese omelet (2 eggs, 1 matchbox-sized piece of cheese, peppers), tomato, 1 slice whole-grain bread
Lunch	Your prepped chicken (1 palm), 1 fist rice or bulgur, roasted vegetables
Snack	1 glass of kefir and 1 handful strawberries
Dinner	Baked meatballs (1 palm), roasted vegetables and potatoes, tzatziki

MOVEMENT

7,000 steps or a 35-minute walk

Spread your steps over the day: morning, lunchtime and evening.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60–75 sec between sets

Squat	**3 × 12**
Push-up	**3 × 8–10**
Row	**3 × 12**
Glute bridge	**3 × 15**
Plank	**3 × 25 sec**

TIP OF THE DAY

Tie your prep to a fixed time, for example 45 minutes every Sunday and Wednesday evening.

TASK OF THE DAY

Cook protein and grains for at least 2 meals, portion them out and put them in the fridge.

MY NOTES

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Choose snacks on purpose

Snacking isn't forbidden. The goal is to choose consciously when and what you snack on.

NUTRITION

Snack when you're really hungry: protein and fiber together. Ready-made alternatives instead of packaged snacks.

Breakfast	1 bowl Greek yogurt, 1 handful fruit, 1 tablespoon oats, 1 teaspoon honey if you like
Lunch	1 bowl lentil soup, 1 palm grilled chicken, chopped salad
Snack	1 apple and 10 almonds, or 1 boiled egg and cucumber
Dinner	Whole-wheat pasta with tuna (1 fist pasta, half a can of tuna, tomato sauce), a big green salad

MOVEMENT

45-minute long walk

In a park, by the water or in nature; with someone if you like.

WORKOUT

Rest day

The long walk is your active recovery today.

TIP OF THE DAY

Keep snacks out of sight and fruit at eye level. Your surroundings are stronger than your willpower.

TASK OF THE DAY

Get 3 ready-to-eat healthy snacks at home (e.g. yogurt, fruit, boiled eggs) and put the packaged ones away in a cupboard.

MY NOTES

END-OF-DAY CHECK-IN

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

See your first progress

Two weeks done. Today you take your measurements and look at what has changed.

NUTRITION

A normal plan day. Remember the plate method at weekend meals.

Breakfast	Scrambled eggs with vegetables (2 eggs), 1 matchbox-sized piece of feta, 5 olives, lots of greens, 1 slice bread
Lunch	1 bowl bean stew with meat, 1/2 fist rice, tzatziki
Snack	1 glass of kefir and 1 clementine
Dinner	Baked chicken and vegetables, 1 medium potato

MOVEMENT

20–30-minute easy walk

Followed by 10 minutes of mobility.

WORKOUT

Rest day

10-minute mobility routine (p. 9).

TIP OF THE DAY

Change doesn't happen at the same speed every week. Your waist can shrink in a week when the scale doesn't move. Look at several measurements together.

TASK OF THE DAY

Fill in the Week 2 Review (p. 31) and write your Day 14 values in the Progress Tracker.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Followed the nutrition plan
- [ ] Movement goal done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

DAYS 8–14

Week 2 review

Don't worry if the number on the scale hasn't changed as much as you hoped. Look at your waist, your energy and your sleep too.

HOW MANY DAYS THIS WEEK?

Water (8–10 glasses)	☐ ☐ ☐ ☐ ☐ ☐ ☐
Protein with every main meal	☐ ☐ ☐ ☐ ☐ ☐ ☐
Half your plate vegetables	☐ ☐ ☐ ☐ ☐ ☐ ☐
Movement goal	☐ ☐ ☐ ☐ ☐ ☐ ☐
Workout (on planned days)	☐ ☐ ☐

MEASUREMENTS

Weight	Waist	Energy (1–5)	Average sleep

Also write the values in the Progress Tracker (p. 12).

What went best this week?

Where did I struggle most?

My one focus for next week:

PHASE 3 · DAYS 15–21

STAY CONSISTENT

The plan feels familiar now. This week you prepare for the hard moments of real life: sudden cravings, invitations, tired days.

IN THIS PHASE

- ✓ Understand sudden cravings
- ✓ Handle tricky everyday situations
- ✓ Plan for eating out
- ✓ Prepare for dips in motivation
- ✓ Turn discipline into a system
- ✓ Keep moving and training

NEW HABITS

The 10-minute rule · Sleep routine · Eating-out plan · Worst-day plan

In this phase, the lowering part of squats, push-ups and lunges takes 3 seconds. Slower, more controlled.

THIS PHASE AT A GLANCE

Day 15	Hunger or craving?	**Workout A**
Day 16	Sleep and appetite	Cardio day
Day 17	Eating out	**Workout B**
Day 18	Invitations and visits	Active recovery
Day 19	When motivation drops	**Workout A**
Day 20	One meal doesn't ruin the plan	Rest day
Day 21	Review your third week	Rest day

TODAY'S FOCUS

Hunger or craving?

Not every urge to eat is hunger. Today you learn to tell physical hunger apart from a sudden craving.

NUTRITION

The 10-minute rule: when a sudden craving hits, wait 10 minutes and drink a glass of water. If the craving is still there, choose a small portion on purpose.

Breakfast	Oat bowl: 40 g (1/2 cup) oats, 1 bowl yogurt, 1 handful fruit, 1 tablespoon hazelnuts
Lunch	Chicken wrap (whole-wheat wrap, 1 palm chicken, vegetables, yogurt sauce), 1 glass of kefir
Snack	1 bowl Greek yogurt, or 1 boiled egg and 1 piece of fruit
Dinner	Grilled fish (1 palm), 1 fist rice or bulgur, arugula and tomato salad

MOVEMENT

8,000 steps or a 40-minute walk

If your starting average is low, add about 1,000 steps to last week instead.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60 sec between sets

Squat (3 sec down)	**3 × 12**
Push-up (3 sec down)	**3 × 10**
Row (1 sec squeeze at top)	**3 × 12**
Glute bridge (2 sec at top)	**3 × 15**
Plank	**3 × 30 sec**

New phase: take 3 seconds to lower. Slower is harder, but more controlled.

TIP OF THE DAY

Physical hunger comes on slowly and many foods will satisfy it. A craving comes on suddenly and usually wants one specific food.

TASK OF THE DAY

If you get a sudden craving today, note the time, what you wanted and how you felt in that moment (bored, tired, stressed).

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Sleep and appetite

Have you noticed you're hungrier after a bad night's sleep? Today you start a sleep routine.

NUTRITION

Finish dinner 2–3 hours before bed. No coffee or energy drinks in the afternoon.

Breakfast	2 eggs, 1 matchbox-sized piece of feta, tomato, cucumber, 1 slice whole-grain bread
Lunch	1 bowl chickpea stew or chickpeas with spinach, 1 bowl yogurt, 1 slice bread
Snack	1 apple and 10 almonds
Dinner	Chicken stir-fry (1 palm), steamed vegetables, 1/2 fist rice

MOVEMENT

40-minute brisk walk

10 min easy + 6 × (2 min brisk, 2 min easy) + 6 min easy.

WORKOUT

Cardio day

No strength workout today; the brisk walk is your cardio session.

TIP OF THE DAY

Going to bed and getting up at the same time every day is the simplest way to support your sleep. Keep the difference under 1 hour, even on weekends.

TASK OF THE DAY

Pick a bedtime for tonight and turn off screens 30 minutes before bed.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Eating out

Restaurant, café or business lunch: your plan works when you eat out too. Today you build a simple strategy for eating out.

NUTRITION

On the menu, choose the protein first (grilled, baked, boiled), then the vegetables. Pick either bread or rice, not both.

Breakfast	Scrambled eggs with vegetables (2 eggs), 1 slice whole-grain bread, cucumber
Lunch	Eating out: grilled meatballs or chicken skewers, a chopped salad, a half portion of rice; water or unsweetened tea
Snack	1 glass of kefir
Dinner	Baked chicken with vegetables (1 palm), 1 bowl yogurt

MOVEMENT

8,000 steps or a 40-minute walk

If you eat out, get off one stop early on the way back and walk.

WORKOUT

Workout B · Full-body strength

5-min warm-up first · Rest 60 sec between sets

Reverse lunge (3 sec down)	**3 × 12 per leg**
Row (1 sec squeeze at top)	**3 × 12**
Push-up (3 sec down)	**3 × 10**
Dead bug	**3 × 10 per side**
Wall sit	**3 × 40 sec**

TIP OF THE DAY

If the portion is large, set half aside right away and ask for a to-go box. Deciding before you start is easier than deciding while you're hungry.

TASK OF THE DAY

Choose “my order” for 2 places you go often and write it down.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Invitations and visits

Family dinners, coffee with friends, holiday visits: social occasions are part of life. Today you plan how to prepare for them.

NUTRITION

Don't arrive very hungry; have a small protein snack beforehand. At the table, take salad and protein first and choose a small portion of dessert.

Breakfast	1 bowl Greek yogurt, 1 handful fruit, 1 tablespoon oats
Lunch	Your prepped chicken and grains, lots of salad
Snack	Before the invitation: 1 boiled egg and cucumber
Dinner	At the invitation: half your plate salad and vegetables, one protein (meat, chicken, meatballs), 1–2 spoonfuls of rice or pastry; a small portion of dessert

MOVEMENT

8,000 steps

Followed by 10 minutes of mobility.

WORKOUT

Active recovery

10-minute mobility routine (p. 9).

TIP OF THE DAY

Saying “It was delicious, I'm really full” isn't rude. Asking for a cup of tea when someone insists on seconds is another option.

TASK OF THE DAY

If you have an invitation or get-together next week, write your plan for it in 2 sentences.

MY NOTES

- [ ] Followed the nutrition plan
- [ ] Movement goal done
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

When motivation drops

Motivation varies from day to day, and that's normal. Today you prepare your “worst-day plan”.

NUTRITION

When you're tired, pick the simplest meal: eggs, yogurt, a ready-made salad. That counts too.

Breakfast	2 boiled eggs, 1 slice whole-grain bread, tomato and cucumber
Lunch	1 bowl lentil soup, tuna salad
Snack	1 bowl yogurt and 1 piece of fruit
Dinner	Vegetable omelet (2–3 eggs), lots of salad, 1 slice bread

MOVEMENT

8,000 steps or a 40-minute walk

If you don't feel like it, start with 10 minutes; more usually follows.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60 sec between sets

Squat (3 sec down)	**3 × 12**
Push-up (3 sec down)	**3 × 10**
Row (1 sec squeeze at top)	**3 × 12**
Glute bridge (2 sec at top)	**3 × 15**
Plank	**3 × 30 sec**

Finisher (optional): 3 × 30 sec brisk marching in place, 30 sec rest.

TIP OF THE DAY

Don't wait for motivation; make starting easy. Lay out your workout clothes the night before.

TASK OF THE DAY

Write your worst-day plan: the 3 smallest steps for a very tired day (e.g. a 10-minute walk, a protein meal, 8 glasses of water).

MY NOTES

END-OF-DAY CHECK-IN

- ☐ Task done
- ☐ Movement goal done
- ☐ Followed the nutrition plan
- ☐ Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

One meal doesn't ruin the plan

One meal can fall outside the plan. What matters is getting back to normal at the next meal. Today you let go of all-or-nothing thinking.

NUTRITION

If you ate something off-plan, don't skip a meal to make up for it. Eat your next meal as planned.

Breakfast	Feta omelet (2 eggs), tomato, 1 slice whole-grain bread
Lunch	1 bowl chickpea stew with meat, 1/2 fist rice, tzatziki
Snack	1 handful roasted chickpeas and 1 clementine
Dinner	Baked salmon or white fish (1 palm), 1 fist roasted potatoes, green salad

MOVEMENT

45–60-minute long walk

Try a new route: a different park or neighborhood.

WORKOUT

Rest day

The long walk is your active recovery today.

TIP OF THE DAY

A slice of cake doesn't ruin the plan. Saying “it's ruined anyway” and giving up on the whole day does. One meal is a tiny part of 30 days.

TASK OF THE DAY

Write this sentence and put it where you can see it: “Even if one meal goes badly, I'll carry on at the next one.”

MY NOTES

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Review your third week

Three weeks are behind you. Today you look at what has already become a habit.

NUTRITION

A normal plan day. Plan the meal you found hardest this week in advance today.

Breakfast	Oatmeal (40 g / 1/2 cup oats, milk), 1 handful fruit, 1 boiled egg
Lunch	Chicken salad: 1 palm chicken, greens, chickpeas, olive oil and lemon
Snack	1 glass of kefir and 1 apple
Dinner	Vegetables cooked with ground meat, 1 bowl yogurt, 1 slice bread

MOVEMENT

20–30-minute easy walk

Followed by 10 minutes of mobility.

WORKOUT

Rest day

10-minute mobility routine (p. 9).

TIP OF THE DAY

The things you now do without thinking are your new foundation. Protect that foundation before you add anything new.

TASK OF THE DAY

Fill in the Week 3 Review (p. 40) and write your Day 21 values in the Progress Tracker.

MY NOTES

ENERGY 1 2 3 4 5

DAYS 15–21

Week 3 review

You have a routine now. The final phase is about making that routine stick.

HOW MANY DAYS THIS WEEK?

Water (8–10 glasses)	☐ ☐ ☐ ☐ ☐ ☐ ☐
Protein with every main meal	☐ ☐ ☐ ☐ ☐ ☐ ☐
Half your plate vegetables	☐ ☐ ☐ ☐ ☐ ☐ ☐
Movement goal	☐ ☐ ☐ ☐ ☐ ☐ ☐
Workout (on planned days)	☐ ☐ ☐

MEASUREMENTS

Weight	Waist	Energy (1–5)	Average sleep

Also write the values in the Progress Tracker (p. 12).

What went best this week?

Where did I struggle most?

My one focus for next week:

PHASE 4 · DAYS 22–30

MAKE IT YOUR SYSTEM

The final phase. You make what you've learned stick and build your own system for life after day 30.

IN THIS PHASE

- ✓ Lock in your habits
- ✓ Review your progress
- ✓ Read setbacks the right way
- ✓ Long-term eating plan
- ✓ Long-term movement plan
- ✓ Long-term training routine
- ✓ Get ready for life after day 30

NEW HABITS

Habit stacking · Weekend plan · Hunger scale · Next-steps plan

You can do 4 sets in this phase. If that's too hard, stay at 3 sets; you'll still make progress.

THIS PHASE AT A GLANCE

Day 22	Lock in your habits	**Workout B**
Day 23	Weekend strategy	Cardio day
Day 24	The hunger scale	**Workout A**
Day 25	Measure your progress	Active recovery
Day 26	Long-term eating	**Workout B**
Day 27	Long-term movement	Active day
Day 28	Long-term training	**Workout A**
Day 29	Plan your next 4 weeks	Active recovery
Day 30	What comes next?	Celebration walk

TODAY'S FOCUS

Lock in your habits

Welcome to the final phase. Today you choose 3 core habits you'll keep going after the 30 days.

NUTRITION

Eating feels familiar now: the plate method, protein with every main meal, half your plate vegetables.

Breakfast	2 eggs, 1 matchbox-sized piece of feta, 5 olives, tomato, cucumber, 1 slice whole-grain bread
Lunch	1 bowl white bean stew, 1/2 fist rice, salad
Snack	1 bowl Greek yogurt and 2 walnut halves
Dinner	Grilled chicken (1 palm), roasted vegetables, 1 fist rice or bulgur

MOVEMENT

8,000–10,000 steps or a 45-minute walk

This could be your long-term movement goal.

WORKOUT

Workout B · Full-body strength

5-min warm-up first · Rest 60 sec between sets

Reverse lunge	**3 × 12 per leg**
Row	**4 × 12**
Push-up	**3 × 10–12**
Dead bug	**3 × 10 per side**
Wall sit	**3 × 45 sec**

Final phase: you can do 4 sets. If that's too hard, stay at 3 sets.

TIP OF THE DAY

Attach a new habit to an existing one: "After I pour my morning coffee, I drink 1 glass of water."

TASK OF THE DAY

Choose 3 habits you'll keep and write each one down, attached to one of your existing routines.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Weekend strategy

A plan that runs smoothly during the week can easily fall apart on the weekend. Today you build a simple plan for weekends.

NUTRITION

3 main meals on weekends too. If you had a late, big breakfast, keep lunch light.

Breakfast	Scrambled eggs with vegetables (2 eggs), 1 matchbox-sized piece of feta, lots of greens, 1–2 slices whole-grain bread
Lunch	Light lunch: 1 bowl lentil soup and 1 bowl yogurt
Snack	1 piece of fruit and 10 almonds
Dinner	Grilled meatballs (1 palm), white bean salad, lots of salad

MOVEMENT

40-minute brisk walk

Or an activity you enjoy: cycling, swimming, dancing.

WORKOUT

Cardio day

No strength workout today. Move with an activity you enjoy.

TIP OF THE DAY

Make weekend movement social: a walk with a friend, a bike ride with your family, a long stroll through the market.

TASK OF THE DAY

Set 1 activity for this weekend and, if you're eating out, 1 meal plan.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

The hunger scale

There's a difference between being full and being stuffed. Today you notice your fullness on a scale from 1 to 10.

NUTRITION

1 = very hungry, 5 = neutral, 10 = overly full. Start a meal at around 3–4 and stop at around 6–7 (comfortably full).

Breakfast	Oat bowl: 40 g (1/2 cup) oats, 1 bowl yogurt, 1 handful fruit, 1 tablespoon hazelnuts
Lunch	Tuna sandwich: 2 slices whole-grain bread, half a can of tuna, lettuce, tomato; a glass of kefir on the side
Snack	Carrot sticks and 2 tablespoons hummus
Dinner	Baked fish (1 palm), steamed broccoli and carrots, 1 medium potato

MOVEMENT

8,000–10,000 steps

Try adding a 15-minute walk at lunchtime.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60 sec between sets

Squat	**4 × 12**
Push-up	**4 × 10**
Row	**4 × 12**
Glute bridge	**3 × 15**
Plank	**3 × 40 sec**

TIP OF THE DAY

It's fine to leave food on your plate. Swap the "clean your plate" habit for a "listen to my fullness" habit.

TASK OF THE DAY

Note your hunger score (1–10) before and after every main meal.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Measure your progress

Before the final days, you take your measurements. The goal is to look at the overall trend, not a single number.

NUTRITION

A normal plan day. Measure in the morning, before breakfast.

Breakfast	2 boiled eggs, 2 tablespoons cottage cheese, tomato, cucumber, 1 slice whole-grain bread
Lunch	6 lentil patties, lots of greens, 1 bowl yogurt
Snack	1 glass of kefir and 1 pear
Dinner	Chicken stir-fry (1 palm), 1 fist rice or bulgur, tzatziki

MOVEMENT

9,000 steps

Followed by 10 minutes of mobility.

WORKOUT

Active recovery

10-minute mobility routine (p. 9).

TIP OF THE DAY

Use your measurements to adjust the plan, not to judge yourself. Something that didn't go as expected isn't a failure; it's new information.

TASK OF THE DAY

Take your weight and waist and compare them with Day 1. Below the Progress Tracker, write at least 1 positive change (energy, sleep, strength, clothes).

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout (none today)

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Long-term eating

Eating for the long term isn't eating perfectly. Today you build a flexible structure for life after the 30 days.

NUTRITION

A simple rule: most of your meals follow the plan, and you make planned room for foods you love.

Breakfast	Feta omelet (2 eggs), spinach, 1 slice whole-grain bread
Lunch	Vegetables stewed with meat, 1 bowl yogurt, 1 slice bread
Snack	1 bowl Greek yogurt and 1 handful fruit
Dinner	Grilled meatballs (1 palm), 1/2 fist rice, lots of salad

MOVEMENT

8,000–10,000 steps

On days you sit a lot, remember to get up once an hour.

WORKOUT

Workout B · Full-body strength

5-min warm-up first · Rest 60 sec between sets

Reverse lunge	**3 × 12 per leg**
Row	**4 × 12**
Push-up	**3 × 10–12**
Dead bug	**3 × 10 per side**
Wall sit	**3 × 45 sec**

TIP OF THE DAY

Instead of banning a dessert you love, add a small portion of it to your weekly plan. What's planned doesn't cause guilt.

TASK OF THE DAY

Write a list of 5 easy meals you can repeat every week after the 30 days (e.g. veggie scrambled eggs, chicken stir-fry, lentil soup).

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Movement goal done
- [ ] Followed the nutrition plan
- [ ] Workout done

WATER ○ ○ ○ ○ ○ ○ ○ ○ ○ ○

ENERGY 1 2 3 4 5

TODAY'S FOCUS

Long-term movement

You've added walking to your daily life. Today you plan how to keep it up in the long run.

NUTRITION

A normal plan day. Before a long activity, have a light snack: fruit and yogurt.

Breakfast	1 bowl Greek yogurt, 1 handful fruit, 1 tablespoon oats
Lunch	Chicken salad (1 palm chicken), 1 slice whole-grain bread
Snack	1 banana and 1 glass of kefir
Dinner	Baked salmon (1 palm), 1 fist rice or bulgur, roasted vegetables

MOVEMENT

60 minutes of activity

A long walk or a new activity you enjoy: cycling, swimming, dancing, hiking.

WORKOUT

Active day

No strength workout today; the long activity is your workout.

TIP OF THE DAY

The best kind of movement is the one you enjoy and can do regularly.

TASK OF THE DAY

Write your movement plan for the next 4 weeks: how many walking days, how many workout days, which day for a long activity.

MY NOTES

END-OF-DAY CHECK-IN

- [ ] Task done
- [ ] Followed the nutrition plan
- [ ] Movement goal done
- [ ] Workout (none today)

TODAY'S FOCUS

Long-term training

The last workout of the plan. Today you compare it with your first workout on day 2 and set your routine for afterwards.

NUTRITION

A normal plan day. Include protein in the meal after your workout.

Breakfast	Scrambled eggs with vegetables (2 eggs), 1 matchbox-sized piece of feta, 1 slice whole-grain bread
Lunch	1 bowl white bean or chickpea stew, 1/2 fist rice, tzatziki
Snack	1 glass of kefir and 1 apple
Dinner	Grilled chicken (1 palm), 1 fist roasted potatoes, lots of salad

MOVEMENT

8,000–10,000 steps

At a different time from your workout.

WORKOUT

Workout A · Full-body strength

5-min warm-up first · Rest 60 sec between sets

Squat	**4 × 12**
Push-up	**4 × 10**
Row	**4 × 12**
Glute bridge	**3 × 15**
Plank	**3 × 40 sec**

Rep test: in your last set of squats and push-ups, count your reps with good form. How do they feel compared with day 2?

TIP OF THE DAY

To keep getting stronger, make the exercises a little harder over time: more reps, one more set, a harder version.

TASK OF THE DAY

Choose 2–3 workout days a week for after the 30 days and put them in your calendar.

MY NOTES

END-OF-DAY CHECK-IN

TODAY'S FOCUS

Plan your next 4 weeks

Tomorrow is day 30. Today you plan the next 4 weeks, so you know what to do when the plan ends.

NUTRITION

A normal plan day. Write next week's shopping list today.

Breakfast	Oatmeal (40 g / 1/2 cup oats, milk), half a banana, 1 tablespoon hazelnuts
Lunch	Your prepped chicken and grains, lots of salad
Snack	1 boiled egg and 1 clementine
Dinner	1 bowl red lentil stew, 1 bowl yogurt, salad

MOVEMENT

30-minute walk

Followed by 10 minutes of mobility.

WORKOUT

Active recovery

10-minute mobility routine (p. 9).

TIP OF THE DAY

Planning reduces decision fatigue. Knowing in advance what you'll eat and when you'll move makes the day easier.

TASK OF THE DAY

Fill in the “Next 4 weeks” template (p. 52).

TODAY'S FOCUS

DAY 30 – WHAT COMES NEXT?

The last day of the plan. Today you look back, take your measurements and make your plan for what's next clear.

NUTRITION

A normal plan day. Celebrate with your favorite meal from the plan.

Breakfast	2 eggs, 1 matchbox-sized piece of feta, 5 olives, lots of greens, 1–2 slices whole-grain bread
Lunch	1 bowl lentil soup, chicken salad
Snack	1 bowl yogurt and 1 piece of fruit
Dinner	Your favorite meal from the plan, built with the plate method

MOVEMENT

30–45-minute easy walk

Your 30-day celebration walk.

WORKOUT

No workout. The plan had 13 workouts; count how many you did and write it down.

TASK OF THE DAY

Write your Day 30 values in the Progress Tracker (p. 12) and answer the questions on the next page.

DAY 30

Look back

Short answers are enough. This page is for seeing what the 30 days gave you.

1. What did I learn in these 30 days?

2. Which habits did I build?

3. What worked well?

4. What do I want to keep doing?

5. What do I need to improve?

The 30 days are over. But the goal doesn't end here.

In these 30 days you didn't finish a diet; you built a system. Now it's about keeping that system and improving it step by step.

5 RULES FOR WHAT COMES NEXT

1. **Keep the foundation.** Protein with every main meal, half your plate vegetables, 8–10 glasses of water a day.
2. **Plan your movement.** Your daily step goal and 1 long activity a week.
3. **2–3 workouts a week.** Keep going with the same exercises and make them harder over time.
4. **1 check-in a week.** Measurements, energy and sleep. Make a small adjustment if needed.
5. **The comeback rule.** If a few days slip, don't start over. Start with your worst-day plan, then open any day in Phase 2 and continue from there.

MAKE YOUR WORKOUTS HARDER STEP BY STEP

Weeks 5–6	Workouts A and B: 4 sets. Your step goal: 8,000–10,000.
Weeks 7–8	Harder versions: e.g. from knee push-ups to classic push-ups, squats with a backpack.

THE NEXT 4 WEEKS

	WORKOUT DAYS	DAILY STEP GOAL	MY ONE FOCUS HABIT	SHOPPING / PREP DAY
Week 1				
Week 2				
Week 3				
Week 4				

You don't have to be perfect. You just have to keep going.

For 30 days you took a step every day. Some days were easy, some weren't. What matters is that you keep taking the next step.

At LEAN MODE PRO we believe a simple, doable and sustainable path is the best start. You can open this guide again whenever you like and restart from any day.

Enjoy the journey.
